

TITLE: A METHOD OF PRODUCING SACCHARIDE PREPARATIONS

ABSTRACT

The present invention relates to a method for the
5 production of saccharide preparations, i.e., syrups, by
saccharifying a liquefied starch solution, which method comprises
a saccharification step during which step one or more enzymatic
saccharification stages takes place, and the subsequent steps of
one or more high temperature membrane separation steps, and re-
10 circulation of the saccharification enzyme, in which method the
membrane separation steps are carried out as an integral part of
the saccharification step.

In another specific aspect, the invention provides a
method of producing a saccharide preparation, which method
15 comprises an enzymatic saccharification step, and the subsequent
steps of one or more high temperature membrane separation steps
and re-circulation of the saccharification enzyme.
